**Preamble:**

The research scholars generate new scientific information through research. Research inventions, discoveries, ideologies, concepts are generated by scientists. Efforts have been made to help the learners to know about different types of scientific reports. Thesis and dissertation, research papers, seminars reports, assignments, synopsis, project reports, popular articles are most common scientific reports. It may be mentioned that knowledge of techniques of research and scientific report writing is not just for completion of thesis or dissertation but it is useful in future professional life wherever one requires writing and presenting scientific and technical information effectively to the targeted audience.
