Analysis of Feedback

As a learning organization, we have always engaged in a continuous process of obtaining feedback from students, parents and alumni in a formal-informal manner and have enriched the teaching learning processes. Department of Education seeks to develop and apply quality parameters for making it a student-centric learning by ensuring a proper feedback system. Feedback from students and alumni is sought regularly about infrastructure and learning resources for ensuring their satisfaction. Accordingly, continuous review of infrastructure and learning resources is carried out by respective committees of department and integrates with annual planning for upgrading academic and support facilities.

Also, department assesses the teachers through their feedback reports. The assessment of the teachers comes through the feedback forms filled by the students, which indicates the quality of teaching skills and knowledge of a teacher. All the students from each and every class are expected to do so for all the teachers concerned with their classes. The identities of students are not disclosed. The feedback form has a precise list of questions that help the students to evaluate the teaching capacity of the teacher based on his/her lecture. These details and its analysis are accessible to staff so as to help them judge their performance. Wherever required, counselling is provided to staff in order to help them improve their professional capabilities.

Individual faculty member also obtain feedback from alumni working in different areas to ensure that it is up-to-date inputs are discussed in the classroom.
