SYLLABUS

BOTANY MSC SEMI&II NEP SYLLABUS SGBAU

Sant Gadge Baba Amravati University Part A Faculty – Science and Technology Programme- M. Sc. (Botany) NEP-2020

POs

- 1. To equip students with strong fundamentals in subject domain knowledge.
- 2. To train students in all the areas of plant science with unique combination of core, elective papers.
- 3. Students can explore the cutting-edge technologies and skills currently used in plant sciences.
- 4. They are made aware of social, environmental issues and plant significance in natural interest.
- 5. To create interest in nature conservation and save the natural resources.
- 6. Focus is equally given on labour work as well as field work.
- 7. To worth together as a team along with other branches of life sciences without any complex.
- 8. To develop scientific temperament and research attitude and much for society.

PSOs 1

- 1. To equip the students with the fundamental concepts of plant sciences
- 2. To understand the basics of structure and functions of cells
- 3. To learn the process of growth and development of plants
- 4. To study the evolutionary process from lower to higher plants

PSOs 2

- 1. To study the concepts of genetics, plant breeding and their applicability
- 2. To understand and correlate the various biochemical and physiological processes in plants
- 3. To study the evolutionary process in Bryophytes and Pteriodophytes
- 4. To study the bioactive principles in plants and their defense mechanisms

Employability Potential:

Joseph Paxton Famous Botanist said that 'Botany the science of vegetable kingdom is one of the most attractive, useful and extensive department of human knowledge, the science of beauty. Any human activity without plant involvement is baseless. Botany is the scientific study of plants. Sant Gadge Baba Amravati University offers M.Sc. Botany a master's Program which deals with study of plants, their characteristics, classification and various related aspects in detail. The main aims and objectives of M.Sc. program are:

- To prepare students for a carrier as scientists, who can deal with current research lines in botany using modern techniques.
- To help them represent the discipline both in basic and applied research area.
- To encourage multidisciplinary collaboration.

• To equip and helpful students in all aspects of plant sciences with a view that they can take up teaching at different levels, researches in institute/university, doctoral work, EIA, Biodiversity studies entrepreneurship, Scientific writing in relevant topics have been included in curriculum.

The duration of this program is two years .There are 30 seats and admission on merit basis. Candidates who wish to opt M.Sc Botany should have Botany as one subject at graduate level and deep interest in plants and their life cycle.

The Syllabi of Botany is designed as per CBSC pattern and is very rich so that along with Botany students can opt for their choices and interest in allied field. The major focus is upon ability and skills other than core course subjects. The whole post-graduate program is of 4 semesters, where students are imparted deep knowledge about plant kingdom, Physiology, Genetics, Molecular Biology, Biotechnology, Genetics Engineering, Pharmacognosy, Ecology, Microbiology, Biosystematics, Tissue Culture, Bioprospecting etc. Botany also deals with various aspects related to Agriculture, Environment, Pharmacy, Forestry, Horticulture and Floriculture. Nursery, farms, Environmental consultancies Pharmaceuticals companies Forest sciences with job profile as Ecologist, Plant Taxonomist, Plant Biochemist, Researcher, Environmental Consultant, forest ranger, Botanists. Nursery or green house manager, Farming consultant, geneticist, Biotechnologists, Microbiologist etc. It would also provide highly skilled human resource for incubation centres and start-ups in the field of plant related industrial units as well as Research and Development sectors.

Study of plants is fundamental and vital as life is dependent on plant for well being of all living organism as plants produce energy, O2 ,C, water etc. Comparing with other forms of life, plants life can be studied at different levels molecular, genetical and biochemical through various cells, tissues, organ, individuals, plants population and communities. Botanists are concerned with identification classification, structure, function of plant life. Botany also covers the Protista group which include fungi, Lichens, bacteria, viruses and single cell algae. A good understanding of plants is essential to the future generation because

- Produce food for expanding population
- Understand fundamental life processes
- Produce medicine and materials to treat disease

Education is not only to gain knowledge and understand the things but it must be able to enhance one's ability and skills for better employability. Employability skills are those which help one to stand separately than others for the same jobs. These skills are vital in order to secure a role where employability, skill matches with your job profile. These skills come naturally or can be acquired through work experience, practice or education.

The employability means, teaching botany at various levels. Employability skills are transferable that students can use this at workplace. Teachers seek all these set of diverse skills in students in addition to academic qualification, in order to stay relevant and improve their efficiency. Teacher should focus on building the employability skills. Various skills can be developed after completion of this program. These are as follows.

- 1. Communication Skills: It is one of the important personality traits which is sought after employment. It generally consists of five elements sender, receiver, message, medium and feedback. It can be verbal, non verbal, visual or written. Good communication skills help any institution/organisation to avoid unnecessary misunderstanding, waste of time and increase the output. To be an effective communicator one has to understand colleagues through ideas and thoughts to achieve the goal. Practices like positive expression, body language, careful listening, think before you speak, debate, group discussion, elocution completion, seminars etc can improve the skills.
- 2. Leadership Skills: Flourishing of any organisation requires good leaders with excellent leadership skills. They look for such persons .Good leaders can manage people/ team well, convince them, motivate them and train them so as to improve the workplaces practices as per the set objectives. Students are given various responsibilities of organising and conduction of event, arrangements and coordination of various activities in team to develop these qualities.
- **3. Problem Solving Skills:** This quality helps to remove the obstacles by resolving complex issues. They are asset to any organisation for increasing the efficiency. It is an act to determine the issue, identify the cause, select best possible solution and implement it. Complex problem can be broken into smaller parts and then the issue can be addressed. In other way it can be solved by research, analyses and then decision can be made. Undertaking research projects, Assignments, brain storming sessions, solving puzzle etc can enhance this skill.
- 4. Team Work Skills: To know role in team and work amicably with teammates. Healthy, cordial relationship with colleagues and better work environment increases job satisfaction. It has direct impact on organisation stability, innovation and output. In practical's, group of 4-5 students are made and they perform the experiment efficiently, group assignments, group activities etc develop these skills.
- **5. Reliability Skills:** This is very important employability skill to build trust with the employer. Consistency is the key of reliability. Meetings, daily task, respond to queries, acknowledge mistakes and take lessons from it are the thing to develop reliability. Mentor –mentee meet often, counselling etc.
- 6. Self Management Skills: It is the ability to organise and manage own works without guide. It saves time and enhances efficiency. Students project work, Botanical Excursions and tours management, preparations for exams, perform experiments in 3hrs etc.
- 7. Learning Skills: It enables to improve the knowledge about the subject. Tend to change to adapt new concepts and methods. Such persons can acquire challenging positions and save time. It ensures quick implementations of new system, process and technology. Students are asked to refer good books of the subject, seminars on recent topics are given, standard protocols are used in practicals etc.

- 8. Technology skills: In present scenario it is must to know and how to use the updated technology. It is one of the leading skills for any institution. Helps to stay relevant and ahead of the competition. These skilled are valued as one can grasp the technology based concept and learn how to use them effectively. Students are using this technology for learning and research purpose.
- **9. Planning and Organization skills:** Important to achieve goals, manage time, money and effort and increase efficiency. Should be resourceful, manage priorities, timely and take decisions.
- **10.Technical and Analytical skills:** Make them skilled in practicals, laboratory equipment's and interpret the data on biological material.

The course is designed in such a way that after completion it is expected that they develop and nurture these employability skill for employment or entrepreneurship development.

Scheme of Teaching, Learning & Examination leading to Two Years PG Degree Master of Science in the Programme Botany following Three Years UG Programme wef 2023-24 Two Years- Four Semesters Master's Degree Programme- NEPv23 with Exit and Entry Option (M.Sc. Part I) Semester I

Course Outcomes

- 4. Develop strong fundamental basics of cell dynamics.
- 5. They would be able to analyze and interpret the cell behavior, cell cycle and cell communication processes.
- 6. They would be able to predict disorders within the biological systems related to gene regulation.
- 7. They would be able to illustrate and justify the biological mechanisms
- 8. Able to explain the structure, synthesis and processing of Nucleic acids.

Part B				
Syllabus Prescri	bed for 2023	Year	PG.	Programme
Programme			M.Se	c. Botany
Semester I				
Code of the Cou	rse Subject	Title of the Couse	/ Subject	No. of periods/ week
DSC II I	BOT102	Evolution and Di	versity of Algae	and Fungi 04
Cos:			v C	0
 Understa Algae in o classificat General a Study of i Xanthoph Fungi: Ge Agricultu 	nd the phycolo diversified has tion of algae, l ccount of thal important grou yta, Bacillaric eneral Charact	de an biofertilizer).	rence to Indian w sh water, marine) an welfare roduction and life nyta, Chlorophyta Rhodophyta.) Criteria used in e history of algae.
Unit I: Algae	reproduction algae. Classificatio (1955), R. E Cyanophyta: special Cell reproduction Chlorophyta patterns and	n and types of life cy on of algae proposed . Lee (2008). : Affinities with Pro ls-Akinites, heteroc n and economic impo	cles in algae, orig by F. E. Fritsch okaryotes and alg yst and harmog rtance of cyanoba organization, rep e of green algae.	production and life cycle
Unit II: Algae	Euglenophyt Xanthop reprodu Bacillari structur of Diato Pheophy diversit	ta –Cell structure and hyta – Occurrend action. ophyta- General C re, Valve Morpholog oms	l reproduction e, distribution, haracters, Occur y Reproduction a acters, geograph conomic importa	thallus structure and rrence Morphology Cell and Economic importance nical distribution, thallus nce
Unit III: Fungi	Mycelium s nutrition, mo fruiting bodi Classificatio classification groups and s Myxomycete Chytridiomy	structure and types ode of asexual repro- tes in different group on as per Ainsw n as per D.S.Hibbett study of representativ es –General account	s, modified hyp duction, phases o s. orth (1971), o c (2007). General re genus. and life cycles of ructure and repro	hal structures, mode of of sexual reproduction and putline of phylogenetic account of the following typical myxomycete duction in <i>Allomyces</i> .

	3.6 Zygomycetes- Vegetative structure and reproduction in <i>Mucor</i> and <i>Rhizopus</i>					
Unit IV: Fungi	General account of the following groups and study of representative genus: Plectomycetes – Vegetative structure and reproduction in <i>Aspergillus</i> Discomycetes - Vegetative structure and reproduction in <i>Peziza</i> Teliomycetes- life cycle of – <i>Ustilago</i> Hymnomycetes- Life cycle of <i>Agaricus</i>					
Unit V: Fungi	General account of the following groups and study of representative genus:					
	Hypomycetes- Alternaria Fusarium,					
	Coelomycetes- Colletotricum					
	Heterothalism and parasexuallity in fungi					
	Major fungal diseases - Candidiasis, Aspergillosis, Mucormycosis					
	Regional crop diseases (Fungal, Viral, Bacterial and Phytoplasmal					
	diseases).					
Unit VI: Applied	Research work in the field of mycology and Phytopathology in India					
mycology	Role of fungi in –Agriculture, Industry and as a food					
	Role of Fungi in antibiotic production.					
	Lichen- nature of association, Morphological types, reproduction and					
	economic importance.					
	Mycorrhiza – Types and its applications.					
	Suggested Reading: 5.1					

- 1. Fritsch, F.E. The structure and reproduction of algae volume 1 and 2
- 2. Robin South, G and Alan Whittick: Introduction to Phycology
- 3. Morris, I: An Introduction to Algae
- 4. Bold, H.C. and Wynne, M.D.: Introduction to the Algae structure and reproduction
- 5. John Webster and Roland W.S. Weber Introduction to Fungi
- 6. Alexopoulos C.J., C.W. Mims and M. Blackwell Introductory Mycology
- 7. Mehrotra R.S. and K.R. Aneja An Introduction to Mycology
- 8. Smith, J.E. The Filamentous Fungi
- 9. Introductory Phycology H.D. Kumar, Affiliated East West Press Ltd., New Delhi. Phycotalk Vol. I and II H. D. Kumar Rastogi Publ., Meerut.
- 10. Recent Advances in Phycology H.D. Kumar Rastogi Publ., Meerut.
- 11. Aquatic Biology in India Kachroo P. Bishan S. Mahendra Pal. Dehradoon
- 12. The structure and reproduction in the Algae –Vol. I & II, F.E. Fritsch, Cambridge4 Uni.Press.
- 13. Cryptogamic Botany Vol. I, G.M. Smith, Tata Mac Graw Hill Publication , New Delhi
- 14. Advances in Phycology-edited by B.N. Verma, APC Publication India.
- 15. Phaeophyceae in India –J.N. Mishra, ICAR Publication, New Delhi.
- 16. Sea weeds and their uses -V.J.Chapman
- 17. Introductory Mycology Alexopolus, John Wiley and Sons Ind.
- 18. An Introduction to Mycology Mehrotra and Aneja, New Age Intermediate Press.
- 19. Diseases of India Rangaswami and Mahadevan, Prentice Hall of India Pvt. Ltd., New Delhi.
- 20. Introduction to Fungi Webster, Cambrdige Univ. Press.
- 21. Plant Diseases R.S. Singh, Oxford and IBH Publishing.

	i. Regional Food, Forage and fodder crops such as
	Sorghum, Cajanus, Maize, Paddy, Pulses.
	ii. Regional Fiber crops – Cotton, Jute & Coir.
	iii. Regional Medicinal and aromatic plant such as Withania somnifera, Vinca rosea, Aloe vera, Mentha
	piperita and Cymbopogon.
	iv. Regional Oil yielding plants & vegetables (Arachis
	hypogaea, Gossypium, Brassica sp., Solanum, and
	Abelmoschus esculentus.
	v. Spices - Ginger, Turmeric, Cinnamon, Clove, Black
	paper & Chilies.
Unit-III	Plants and their value in the service of the mankind
	General account and parts from which these are obtains,
	methods of extraction and uses, paper making Tannins, Dyes,
	Gum and Resins, Rubber & Latex. Innovative approaches for meeting world food demands
	movative approaches for meeting world food demands modern agricultural approach.
	Plants used as Avenue trees for shade and asthetics.
	Fire wood & Timber woods their identification properties and
	users, Teak, Shisam, Sal, Neem, Mango, Babul.
Unit – IV	Concepts of growth and development, zygote, embryonic
	development; stages; polarity and symmetry, developmental
	plasticity; Morphogenetic gradients, pluripotency;
	Cell fate and cell lineages determination, Meristem
	development, types of meristem;
	Anatomical features, vascular elements; differentiation of
	xylem, phloem, secretory tissues, Nectaries, laticifers, resin ducts.
	Teshi ducis.
Unit-V	Organization of Shoot and Root Apical Meristems (SAM &
	RAM), molecular regulation and mutant analysis in
	Arabidopsis and Antirrhinum,
	Leaf development, determination of phyllotaxy and molecular
	regulation in Arabidopsis and Antirrhinum; leaf anatomy,
	development of epidermis, mesophyll, trichomes and stomata.
	Secondary growth; cambium, structure and development of
	wood.
Unit-VI	Concept of lead Botanical gardens and Biodiversity parts field
	gene banks, seed banks.
	Legal aspects of conservation of biodiversity in India.
	General account and activities of national institutes like
	botanical survey of India (BSI), National Bureau of plant
	Genetic Resources (NBPGR), Indian Council of Agricultural
	Research (ICAR), Council of scientific and Industrial Research
	(CSIR) Ministry of Environment & Forest and Climate change.

Learning Outcome:
After completion of this course student would be able to –
1. Understand the pattern origin diversification and cultivation & plant in nature.
2. Know about origin and cultivation and various economically importance crop plants.
3. Student study the strategies for conservation of biodiversity.
4. They become well worst with the plants utilized by human race.
5. Know about plant anatomical structure, their developmental patterns.

PG Programme

Programme: M. Sc. Botany	10110g	
Semester I Code of the	Title of the Course/Subject	(No. of Periods/Week)
Course/Subject	(Laboratory/Practical/practicu m/hands-on/Activity)	
Practical – I BOT-PR01	Practical based on DSC I.1 &	04
	II.1	

DSC I Cell and Molecular Biology

Syllabus Prescribed for 2023 Vear

Laboratory Exercises

- 1. Differential Centrifugation for isolation of cell fractions.
- 2. Isolation and extraction of cell organelles like mitochondria/ chloroplast.
- 3. Isolation and observations on B Chromosome.
- 4. Preparation of cytological slides for chromosomal non-disjunction in *Rhoeo/Tradescantia*.
- 5. Prepare slides of mitosis and meiosis in some monocots like Allium, Aloe, Brassica etc.
- 6. To determine mitotic index.
- 7. SDS PAGE separation of seed storage proteins and quantification of each fragment.
- 8. Isolation and purification of genomic DNA from plant materials by CTAB Method.
- 9. Isolation and purification of RNA from plants.
- 10. Quantitative estimation of genomic DNA and RNA using spectrophotometer.
- 11. Agarose gel electrophoresis of genomic DNA and RNA and detection using gel documentation system.
- 12. Digestions of DNA by restriction enzymes and size fractionation of fragments
- 13. Isolation of Plant DNA and prepare Cot curve.
- 14. Demonstration of western blotting.
- 15. Study of electron micrographs of cell organelles.
- 16. Study of permeability of living cell to acids and bases.
- 17. Restriction Digestion of lambda DNA / Plasmid DNA, its electrophoresis and molecular weight determination.
- 18. Visit to National Laboratory or Research Lab to study latest techniques or sophisticated equipment from technical person.

Evolution and Diversity of Algae and Fungi:

1	Morphological study and monographs of Algae :(Any 12 of the following) Oscillatoria, Nostoc, Anabaena, Spirullina, Gleotricha, Chlamydomonas, Eudorina, Volvox, Closterium, Hydrodictyon, Pediastrum, Cladophora, Ulva, Pithophora,
	Draparnaldia, Cosmarium, Chlorella, Acetabularia, Chara, Nitella, Laminaria,
	Voucharia, Sargassum, Padina, Ectocarpus, Batrachospermum, Gracillaria, Gellidium, Polysiphonia, Diatoms.
2	Morphological Studies and monograph of Fungi (any 15 of the following)

	Stemonities, Perenospora, Phytopthora, Albugo, Mucor, Rhizopus, Yeast, Aspergillus,		
	Penicillium, Chaetomium, Taphrina, Peziza, Erisyphe, Phyllactenia, Uncinula,		
	Melampsora, Uromyces, Drechslera, Ravenallia, Ustilago, Polyporus, Morchella,		
	Cyathus, , Alternaria, Helminthosporium, Curvularia, Colletotrichum, Phoma,		
	Plasmodiophora, Cercospora, Fusarium, Claviceps.		
3	Permeant Slides or Culture of following fungal forms		
	Rhizopus, Mucor, Aspergillus, Penicillum, Drechslera, Curvularia. Phoma,		
	Colletotrichum, Alternaria, Helminthosporium Trichoderma. Symptomology of some diseased plants (any 10 of the following).		
4	White rust of Crucifers, Downy mildew, powdery mildew, Rusts, Smuts, Ergot,		
	Groundnut leaf spot (Tikka disease), False smut of paddy, red rot of Sugarcane, Wil		
	disease, Citrus canker, Angular leaf spot of cotton, Leaf mosaic of bhindi/ papaya, Leaf		
	curl of tomato/Potato/Papaya, Little leaf of Brinjal, Types of Lichens.		
5	Field study: i) Collection of Algal material from water reservoirs		
-	(ii) Photography of Diseased plant parts		
	(iii) Microphotography of fungal isolates		
	Learning Outcome:		
	1. Create monographs of algal isolates.		
	 Classify and identify algal genus 		
	3. Demonstrate the application of algae in different fields		
	4. Create monographs of fungal isolates		
	5. Classify and identify algal genus.		
	6. Diagnosis of plant diseases		
1	7. Create compendium of plant diseases		

SANT GADGE BABA AMRAVATI UNIVERSITY, AMRAVATI PRACTICAL EXAMINATION M.Sc. I (Botany), SEMESTER – I (NEP-20)

PRACTICAL I: CELL AND MOLECULAR BIOLOGY AND EVOLUTION AND DIVERSITY OF ALGAE AND FUNGI

PRACTICAL SCHEDULE

PRACTICAL SCHEDULE	
Time: 6 hrs.	Marks - 50+50=100
Preparation of Mitosis slides and calculation of Mitotic Index of any	
cytological material.	05
Extraction and Estimation of Plant Genomic DNA using	
UV-VIS Spectrophotometer	05
Q.3. Isolation and Identification of any two algal forms from the given material.	10
Q.4. Isolation and Identification of any two fungal forms from the given material	. 10
Q.5. Comment on the given experiment from CMB	05
Q 6. Comment on the given experiment from EDAF	05
Q.7. Spotting	10
Practical Internal	
	20
Q.8. Record/ Assignments	
Q.9.Viva Voce	20

* List of Practical/Laboratory Experiments/Activities etc.

Sant Gadge Baba Amravati University, Amravati

PG Programme

Syllabus Prescribed for 2022 Year Programme: M. Sc. Botany

Q.10. Attendance,

Semester I Code of the Course/Subject Title of the Course/Subject (Laboratory/Practical/practicu m/hands-on/Activity) (No. of Periods/Week) Practical II BOT PR-02 Practical based on DSC III.1 02

* List of Practical/Laboratory Experiments/Activities etc (Economic Botany and Resource Utilization).

Practical Course is divided into three units

10

- 1) Laboratory work
- 2) Field Survey
- 3) Scientific visits

laboratory work.

- 1) Morphology, Anatomy, uses, micro chemical tests for stored food material for following food crops. Wheat, Rice Jowar, Maize, Chickpea (Bengal gram), Potato, Sugarcane.
- 2) Study of any three important forage/fodder crops of the locality ex. *Sorghum*, Bajra, Wheat, Maize.
- 3) Plant fibres. Morphology, anatomy, microscopic study of following fibres.
- 4) Study of textile fibre:
 - a. Cotton, Jute, Coir, Linen, Sun hemp, Cannabis.
 - b. Study of cordage fibre Coir.
 - c. Fibbers for stuffing Cotton, Silk Cotton or Kapok
- 5) Study of Medicinal and aromatic plants: Depending on the geographical location of the college/ University select five medicinal and aromatic plants from a garden crop field or from the wild only if they are abundantly available.

Catharanthus roseus, Adhatoda zeylamica (Syn. A. vasica), Allium sativum, Withania somnifera, Tinospora cordifolia, Centella asiatica, Phyllanthus niruri, Aloe barbadense, Commiphora mukul, Asparagus racemosus, Mentha piperata, Ocimum sanctum, Vetiveria zizanoides, Rauvolfia serpentina, Cymbopogon Sp., Cissus quadrangularis, Tribulus terrestris, Vitex negundo, Abrus precatorius. Study of live or herbarium specimens for other visual materials to become familiar with these sources. (Morphology, identification, uses, products & conservation studies.

- 6) Vegetable oils : Mustard, Ground nut, Soyabean, Coconut, Sunflower and Castor. Morphology, microscopic studies of the oil-yielding tissues, test for oil and iodine number
- Study of Gums, Resins tannis & Dyes Perform simple test for gums and resins prepare a water extract of vegetable tannins (*Acacia, Terminalia*, Tea, *Cassia* sp. *Myrobalans*) and dyes (Turmeric, *Bixa orellana, Butea monosperma, Indigo, Lawsonia inermis*) and perform test to understand chemical nature.
- 8) To prepare ombrothermic diagram for different sites based on given data and comment on climate **Course Outcomes Students would be able to**
 - 1. Importance cultivation & uses of economically important plants.
 - 2. Identification morphology & uses of medicinal plants which are locally available.
 - 3. Extramural, sources of various non-wood forest products.
 - 4. Conservation strategies of rare & threatened plant species
 - 5. Important plants & their value in the service of the mankind

Plant Development

Laboratory and Field Exercises

- 1. Study of vegetative and reproductive apical meristems.
- 2. Anatomical studies on secondary growth (wood)
- 3. Study development of epidermal structures (trichomes, glands and lenticels) and
- 4. Study of secretory structures (nectaries and laticifers)
- 5. Histochemical comparison between vegetative SA and reproductively induced SA
- 6. Observations on:
 - Microsporogenesis and development of male gametophyte (pollen)
 - o Megasporogenesis and development of female gametophyte
- 7. Study on types of endosperm, dissection and isolation of endosperm
- 8. Observations on stages of embryo development, dissection and isolation of developing embryo (3 stages)
- 9. In vitro germination of spore/pollen, correlation between fertility (stainability), viability

- 10. Germination study and (TTC and FDA staining) and germinability (*in vitro*) of pollen grains.
- 11. Study of xylem and phloem elements using maceration, staining, light and electron micrographs (xerophytes, hydrophytes and halophytes).
- 12. Induction of somatic embryos using a suitable plant material.
- 13. Demonstration of the effect of ABA on stomatal closure.
- 14. Aniline blue fluorescence method to localize pollen tubes to study different aspects of pollen-pistil interaction.
- 15. Study the organization of root and shoots with different sections.

SANT GADGE BABA AMRAVATI UNIVERSITY, AMRAVATI PRACTICAL EXAMINATION M.Sc. I (Botany), SEMESTER – I (NEP-20)

PRACTICAL-II: ECONOMIC BOTANY, RESOURCE UTILIZATION AND PLANT DEVELOPMENT

Time: 3 Hrs.	Marks: 25+25=50
Q.1: Morphology, Botanical identification and Economic importance	
of food/fiber crop (Any one)	10
Q.2: Any two phytochemical test	05
Q.3:Setting and working of any major experiment based on Plant Develop	ment 10
Practical Internal	
Q.4: Viva-Voce	10
Q.5: Practical Record, Attendance and Assignments	15

ELECTIVE OPTIONS UNDER NEP-20

Part B			
Syllabus Pres	cribed for 2023 Year	P.G. Programme	
0	Programme : M.Sc. Botany		
	Semester: I		
Code of the	Code of the Course Subject Title of the Couse/ Subject No. of periods/ week		
DSE I BOT104-A Angiosperm Taxonomy, Phytochemistry 03 and Pharmacognosy			
COs:			
 Study plant morphology, Description of a plant specimen, Study of locally available families of flowering plants, Identification of genus and species of locally available wild plants. 			
2) Apprec	ciate the need to conserve floristic and cultur	al diversity of the region.	
· · ·	ation of botanical keys at generic level by lo		
/	velop laboratory skill like isolation, extraction	n & evaluation of phytochemicals	
	from medicinal plants.		
5) To develop knowledge of herbal drugs and new commercial plant products.			
6) Rescue and document Ethnobotanicals for sustainable use of plant resources.			
UNIT I :	Scope, Aims, Principles of Taxonomy,	Historical Development of Plant	
	Taxonomy; Study of Basic Principles and R	ecent Angiosperm Phylogeny Group	
	(APG) System of Classification. Taxonomic Literature: Checklist, Catalogue,		
	Floras, Monographs, Indices and Journals, Taxonomic Keys and DNA		
	Barcoading		

UNIT II :	International code of Botanical Nomenclature Type method, valid publication,	
	Rule of priority, Author citation, conservation of names and rejection of names,	
	Herbarium Preparation and use, Digital Herbarium, Role of Botanical Garden .	
	Different theories of origin of angiosperms.	
UNIT III :	Modern concepts and trends in plant taxonomy: Elementary treatment of	
	Cytotaxonomy, Chemotaxonomy, Numerical Taxonomy, Molecular Taxonomy,	
	Cladistics	
UNIT IV :	Taxonomic evidence: Wood anatomy, Floral Anatomy, Embryology,	
	Palynology, Cytotaxonomy, Biosystematics, Chemotaxonomy and Numerical	
	Taxonomy. A brief account of major contribution made by the following	
	Taxonomists: Carl Linnaeus, Joseph Dalton, Hooker, William Roxburgh, John	
	Friminger and Duthie.	
UNIT V :	Basic principles of phytochemical techniques, Classification of Phytochemicals.	
	Extraction and Isolation of Phytochemicals, Spectrophotometry- Principle and	
	application, UV Visible and Infra-Red Spectroscopy.	
UNIT VI :	Chromatographic techniques- Paper chromatography, Thin Layer Chromatography (TLC), High Performance Liquid Chromatography (HPLC), Gas Liquid Chromatography (GLC).	

Semester I Code of the Course/Subject	Title of the Course/Subject (Laboratory/Practical/practicu m/hands-on/Activity)	(No. of Periods/Week)
Practical III	Practical based on DSE I	02

List of laboratory experiments:

- 1) Identification of families mentioned in the syllabus with the help of salient features
- 2) Preparation of dichotomous key
- 3) ICN problems
- 4) Name of the plant using Gamble
- 5) Submission of 30 herbarium sheets
- 6) Field trip for minimum of 3 days for collection of plants and preparation of herbarium
- 7) Study of local flora
- 8) Spotters related to Theory

DSE Molecular Systematics of Plants- Elective-I

Laboratory Exercises

Major Experiments

- 1. Live plants/ Herbarium specimens of the following families will be provided in the class for description and identification (classification based on APG II, 2003):
- 2. Basal Angiosperm and Magnoliids: Nymphaeaceae, Magnoliaceae
- 3. Basal Monocots: Araceae, Alismataceae
- 4. Petaloid monocots: Liliaceae, Smilacaceae, Alliaceae, Orchidaceae
- 5. Preparation of identification keys for at least 10 specimens based on morphological features.
- 6. Use of palynological, chemical methods in taxonomy

Minor Experiments

- 7. Writing exercise
- 8. Nomenclature exercise
- 9. Classification exercise
- 10. Cladogram construction and analysis

 Nelson, D.L. and Cox, M.M. (2008). Lehninger Principles of Biochemistry (5thed.). New York Buchanan, Gruissem and Jones. 2002. Biochemistry and Molecular Biology of Plants. American Society of Plant Biologists. 			
5. Annual Review of Plant Biology (formerly Annual Review of Plant Physiology and Plant Molecular Biology).			

- 6. **BASIC REFERENCES:** Alberts et al., Molecular Biology of the Cell (parts related to plants); Salisbury and Ross, Plant Physiology; Taiz and Zeiger, Plant Physiology; Hopkins and Huner, Introduction to Plant Physiology.
- 7. **CURRENT LITERATURE** (JOURNAL ARTICLES): Plant Physiology, The Plant Cell, Journal of Plant Physiology, Physiologia Plantarum, Plant Physiology and Biochemistry, Postharvest Biology and Technology, Hortscience, Journal of the American Society for Horticultural Science, Science, Nature, Scientific American etc.
- 8. Many plant physiology journals can be viewed via the net. The URL of one of the sites listing these journals is: <u>http://www.e-journals.org/botany/</u>

Learning Outcome:

After successful completion of this course, students will be able to:

- 1. The students will learn and demonstrate the physiological mechanisms of Water, minerals uptake and transport; they can correlates with present day's challenges for plant growth, development and survival.
- 2. The students will understand the evolutionary history of photosynthetic organisms and their adaptability in changing environmental conditions; they can interpret the photosynthetic productivity in relation to changing climatic conditions and food security
- 3. They will acquire the knowledge and demonstrate the various mechanisms of translocation of photosynthetic products to different sink
- 4. The students will learn various plant responses against environmental changes and challenges; they can understand unique strategies of plants to resolve the various stresses

Semester I Code of the Course/Subject	Title of the Course/Subject (Laboratory/Practical/practicu m/hands-on/Activity)	(No. of Periods/Week)
Practical III	Practical based on DSE I	02

List of Experiments:

- 1. Assay of catalase, peroxidase and ascorbic acid oxidase activity; determination of Km value of Urease.
- 2. Complexometric assay of Calcium and Magnesium
- 3. Colorimetric estimation of IAA.
- 4. Isolation of chloroplast and assay of Hill activity
- 5. Tetrazolium test of seed viability
- 6. Estimation of total phenolic content from seeds.
- 7. Colorimetric estimation of amino groups by Ninhydrin reaction.

29.Biometrical Genetics. Chapman & Hall. Mather K & Jinks JL. 1971.

30 .Watson J.D, Baker T.A, Bell S.P, Gann A, Levine M and LosickR.Molecular Biology of the Gene. . Benjamin-Cummins Publishing Co.,

Learning Outcome:

After successful completion of this course, students will be able to:

1.To make acquainted with various latest genetic engineering

2. Explain the basics, methodology and applications of plant tissue culture.

3. Design experiments for functional characterization of plant genes and to identify those suitable for creating agronomically important traits.

4 Conceptualize plant transformation, selection of desirable genes for crop improvement, design binary vector and procedure for generating GM crops.

Semester I	Code of the Course/Subject	(No. of Periods/Week)
Title of the Course/Subject	(Laboratory/Practical/practicum/ hands-on/Activity)	02

List of Experiments:

1.Quantitation of nucleic acids.

2 Isolation of plasmid DNA.

3.Isolation of RNA

4. SDS – PAGE.

- 5. To extract genomic DNA from leaves and to analyse the extracted DNA by Agarose Gel Electrophoresis.
- 6.Mechanical isolation of mesophyll protoplasts.

7. Protoplast fusion using polyethylene glycol solution.

8. Emasculation and bagging of flowers of Brasicaceae, Malvaceae, and liliaceae,

9. Principles of spectrophotometry,

10.Preparation of stocks - macronutrients, micronutrients, vitamins and hormones, filter sterilization of hormones and antibiotics. Preparation of Murashige and Skoogmedium. SANT GADGE BABA AMRAVATI UNIVERSITY, AMRAVATI PRACTICAL EXAMINATION M.Sc. I (Botany), SEMESTER – I (NEP-20) PRACTICAL-III: Molecular Biology, Biotechnology, and Plant Breeding-Elective-I DSE-I

Time: 3 Hrs.	Marks: 25+25=50
Q.1: Setting and working on any major experiment	15
Q.2: Setting and working on any Minor experiment	05
Q.3 Comment on principle and working of analytical instrument.	05
Practical Internal	
1. Attendance	05
2. Visit to any Molecular/Biotechnology & Report Submission.	10
3. Activity-	
Botanical Excursion/Short/Long- to study the plant	
diversity in natural habitat Report Submission.	05
4. Record Book	05
Other Stream / Eaculty Course	

Other Stream/ Faculty Course

Part B						
Syllabus Prescribed for 2023	Year PC	G. Programme				
Programme	Μ	I.Sc. Botany				
Semester I						
Code of the Course Subject	Title of the Couse/ Subject	No. of periods/ week				
BOEC I	Medicinal Plant Diversity	04				
 To study the Ethnic tribes in ethnobotany To study the significance and cultivation of medicinal plants To make students aware about IPR. 						
4. To know the organization Unit-I	b know the organizations' working in these lines. History of Medicinal and Aromatic Plants, terms used in herbal medicine Ayurveda, Siddha, Unani, Homeopathy, Aroma Therapy.					
Unit-II	Importance of Medicinal Plants, D Natural Sweeteners, Herbal Produ	e				
Unit-III	Cultivation practices of some medicinal plants like: <i>Asparagu.</i> <i>Chlorophytum, Tinospora cordifolia, Dioscorea, Aloe</i> sp Conservation, Rate data book, CBD, FAO Mandate.					
Unit-IV	Ethno Botany: History, significand branches, Tribes of India, Ethno-J	ce, scope and objective,				
Unit-V	Intellectual property rights: IP Trademarks, TRIPS, PGR, Copyri Trade.	R, Patents, Trade secrets,				
	Suggested Reading:					

- 1. V.V. Sivarajan & I. Balachandran, (1994). Ayurvedic Drugs and their Plant. Oxford & IBH.
- 2. Cultivation of Medicinal and Aromatic Plants by A.A. Farooqi (2004).
- 3. Ethnomedicine and Human Welfare by Irfan Ali Khan and AtiyaKhatun (Vol-I, II, III, IV & V)
- 4. Handbook of Ayurvedic Medicinal Plants by L.D. Kapoor (2005).
- 5. Handbook of MAPs by S.K. Bhattacharjee (2009).
- 6. Handbook of Medicinal and Aromatic Plants by S.K. Bhattacharjee (2004).
- 7. Indian Medicinal Plants (Vol 1- 4) by K.R. Kirtikar and B.D. Basu (2006).
- 8. Indian Medicinal Plants by P.C. Trivedi (2009).
- 9. Indigenous Medicinal Plants Social Forestry & Tribals by M.P. Singh et al. (2003).
- 10. IPR, Biosafety and Bioethics by Goel and Parashar (2013)
- 11. IUCN Red List Categories by IUCN (1993).
- 12. Medicinal and Aromatic Plants by H. C. Srivastava, ICAR (2014)
- 13. Medicinal and Poisonous plants of India, by C. Algesi Boopathi (2021)
- 14. Medicinal Plants Cultivation: A Scientific Approach by S.S. Purohit (2004).

15.	Medicinal Plants: Chemistry and Properties by M. Daniel, Oxford & IBH
	Publishing Co. Pvt. Ltd.
16.	Medicinal Plants: Conservation Cultivation & Utilization by A.K. Chopra, Daya
	publishing house, Trinagar, Delhi (2007).
17.	Psychoactive Medicinal Plants: Hallucinogenic and Narcotic Drugs by Rita
	Singh; Global Vision Publishing House (2017)
18.	Recent Progress in Medicinal Plants Vol.12, Globalization of Herbal Health by
	A.K. Sharma (2006).
19.	Text Book of Medicinal and Aromatic Plants, ICAR (2018)
20.	Tribal India, by Nadeem Hasnain (2021)
21.	Tribes of India (Vol- I & II) by A. Ashok and P. V. Lakshmaiah (2018)
22.	Medicinal Plants of Uttarakhand by C.P. Kala (2010).
23.	Handbook of Ayurvedic Medicinal Plants by L.D. Kapoor (2005). Medicinal
	Plants: Biodiversity and Drugs - M. K. Rai, G A. Cordell, J L. Martinez, M
	Marinoff, L Rastrelli
24.	Modern Phytomedicine – Ahmad Iqbal, Aqil Farrukh, Owais Mohammad
25.	Herbal medicine: bimolecular & clinical aspects - FF Benzie & SW Galor
26.	Quality Control of Herbal Drugs – PK Mukherjee
	Learning Outcome:
The students w	vill be able to
1.	Explain and elaborate the history, scope and significance of medicinal plants.
2	Apply this knowledge in cultivation of medicinal plants that are rare and endangered.
3.	Practically use some of these plants in minor ailments.

- Know *ex-situ* and *in-situ* conservation of some rare medicinal plants. Patenting and preservation of Traditional knowledge. 4.
- 5.

Pre-requisite Course mandatory if applicable: Prq, Theory : Th, Practical/Practicum: Pr, Faculty Specific Core: FSC, Discipline Specific Core: DSC, Discipline Specific Elective: DSE, Laboratory: Lab, OJT: On Job Training: Internship/ Apprenticeship; Field projects: FP; RM: Research Methodology; Research Project: RP, Co-curricular Courses: CC

Note : # On Job Training, Internship/ Apprenticeship; Field projects Related to Major (During vacations of Semester I and Semester II) for duration of 120 hours mandatory to all the students, to be completed during vacations of Semester I and/or II.

This will carry 4 Credits for learning of 120 hours. Its credits and grades will be reflected in Semester II credit grade report.

Note: Co-curricular Courses: In addition to the above, CC also include but not limited to Academic activities like paper presentations in conferences, Aavishkar, start-ups, Hackathon, Quiz competitions, Article published, Participation in Summer school/Winter School / Short term course, Scientific Surveys, Societal Surveys, Field Visits, Study tours, Industrial Visits, online/offline Courses on Yoga (Yoga for IQ development, Yoga for Ego development, Yoga for Anger Management, Yoga for Eyesight Improvement, Yoga for Physical Stamina, Yoga for Stress Management, etc.). These can be completed cumulatively during Semester I, II, III and IV. Its credits and grades will be reflected in semester IV credit grade report.

Part B Syllabus Prescribed for 2023 Year PG. Programme Programme M.Sc. Botany Semester II **Code of the Course Subject** Title of the Couse/ Subject No. of periods/ week **DSC I- BOT-201** 04 **Plant Physiology** Cos: 1. This course aims to educate student on concepts of proteins, enzymes, basic plant signaling mechanisms, sensory photobiology. The course further deals with physiology of nutrient uptake, photosynthesis and nitrogen metabolism. 2. To make them aware about the latest techniques used in plant sciences To make friendly about the tools and techniques. 3. To know the principle and applications of these techniques. 4. **Bioenergetics, enzyme kinetics:** Unit-I Thermodynamics, entropy, enthalpy; Bioenergetics; Gibbs's free energy, concept of catalysis and mechanism, types of enzymes, enzyme kinetics, enzyme regulation and inhibition; isozymes Unit-II **Photosynthesis:** Light-harvesting complexes and their evolution; energy funneling, antenna pigment system, photoprotective mechanisms; mechanisms of electron transport; photosynthesis inhibitors, carbon fixation; C3, C4, and CAM pathways and their evolutionary relationship, adaptability and crop productivity; photorespiratory pathways; C2 cycle and its significance. **Unit-III Respiration and secondary metabolites:** Regulation of glycolysis; citric acid cycle, alternate oxidase; plant mitochondrial electron transport and ATP synthesis; PPP, Glyoxylate pathway and its significance. Stress Physiology: responses to biotic and abiotic stresses. Unit-IV Plant hormones and photomorphogenesis: Biosynthesis, storage, breakdown, and transport; physiological effects and mechanisms of action. Auxins Gibberellins, Cytokinins, Ethylene, Abscissic acid, Brassinosteriods, Jasmonic acids, Polyamines, salicylic acid. Structure, function and photomorphogenic responses, of phytochromes, cryptochromes and phototropin, photoperiodism and floral induction, Biological Clocks; Stomata movements. Unit-V Solute transport and photo assimilate translocation: Uptake and transport of water, minerals, ions, solutes and macromolecules from soil through cells, xylem and phloem; membrane transport proteins; active, passive transport, mechanisms of loading and unloading of photo assimilates. Assimilation of nitrate, ammonia, sulphur and phosphate. Unit-VI Electrophoresis: Principle, types, separation of proteins and nucleic acids, buffer, detection assay, storage, safety of application. Western blotting, Northern blotting, southern blotting Fundamentals of chromatographic separation methods – Definition, Principles of chromatography, sorption mechanisms - differential migration, partition and adsorption phenomena; Classification of different chromatographic methods; Methods of development- Elution development, Gradient elution development, displacement development and frontal analysis. Dynamics of chromatography-efficiency of chromatographic column, zone spreading, Height Equivalent to Theoretical plate (HETP). Thin Layer Chromatography: Principle, chromatographic media-coating materials, applications, activation of adsorbent, sample development, solvent systems, development of chromatoplate, types of development, visualization methods, documentation, applications in the separation, HPTLC principle, technique, applications. **Suggested Reading:**

Learning Outcome:

Hall

- 1. Students would be able to demonstrate a depth of knowledge of physiological processes together with a better understanding of interaction and regulation of growth, metabolism and development and influence of environment on plant and further will be able to communicate scientific ideas in both written and oral forms to diverse audiences.
- 2. The students would be able to showcase knowledge of various signal transduction mechanisms in plants. The concept of second messengers, calcium signaling, kinases/phosphatases in plant signaling would be delineated to

enhance their grasping power for understanding of different signaling pathways operative in plants. Two component signaling concept would be introduced and extended to plant hormone signaling. Quorum sensing and its potential biotechnological applications should be clear to students after these classes.

3. During the course students would gain knowledge about various mechanisms such as channel or transport proteins involved in nutrient uptake in plants. Further the course will deal with various phytohormones and their role in physiology of growth and development. This course will introduce students to physiological advances in sensory photobiology.

Book Depot, Allahabad.
28. Eames, A.J.(1974): Morphology of Vascular Plants- lower groups, Tata Mc-Graw
Hill publishing Co., New Delhi.
Learning Outcome:
Upon successful completion of this course, the student would be able to:
1. Classify Bryophytes into various groups, study their importance
2. Classify Pteridophytes into various groups, study their importance and multiplication of
important ferns
3. Create awareness on the threats to biodiversity and sensitize towards the Biodiversity
Conservation for sustainable development.

Part B							
Syllabus Prescribed fo	r 2022 Year	ar PG. Programme					
Programme		M.Sc. Botany					
Semester II		-					
Code of the Course Su	bject Title of the Couse/ Subjec	t No. of periods/ week					
	0	-					
DSC III BOT-2 Cos:	03 Plant Biochemistry, Gene	tics and Plant Breeding 03					
 To understand the c To study the inherita To know the role of 	oncept of classical and modern gene ance pattern. chromosomes in evolution and the f and breeding and their significance i	actors leading to changes in them.					
5 To study the variation6 To study the plant b							
Unit-I	biological significance, important g	l properties of carbohydrates, glycoprotein, Lipids: Classification, nt lipids, biological significance of and storage.					
Unit-II	 Amino acids: Uptake, Assimilation and Reduct Amino acid classification, proper Biosynthesis of Amino acid Lipids: Classification, Structure and properties Biosynthesis of Fatty acids, Membrane lipids, Structural lipide Catabolism of lipids, Phospholipids, Sphingolipids, detection 	tion of Nitrogen rties, functions perties, functions, ds, Storage lipids, erived lipids,					
Unit-III	-	nce, gene interactions, pleiotropy, e, expressivity and phenocopy.					
Unit-IV	Chromosome structural aberration translocation, complex translocatio	s; deletion, duplication, inversion, on.					

	Chromosomal Numerical aberrations, Euploidy and aneuploidy and
	their genetic implications.
	Polyploidy: Types, origin and meiotic behaviour,
	Karyotype analysis; method and evolution; banding patterns,
Unit-V	applications Plant Breeding; history, Breeding methods; self-pollinated crops; mass
Unit-v	selection, pureline selection, pedigree selection, bulk method,
	backcross method, Clonal selection, Hybridization
	Mutational breeding; methods, types, treatments, selections of mutants
	Role of polyploids in plant breeding, heterosis and inbreeding depression
Unit-VI	Population genetics: Allele frequencies and genotype frequencies,
	random mating and Hardy-Weinberg principle, Implications of Hardy-
	Weinberg principle, rate of change in gene, frequency through natural
	selection, mutation, migration and random genetic drift.
	Biostatistics: samples, data, graphs, frequency distribution, mean,
	variance and deviation, Binomial and Poisson distribution and Chi-
	Square test.

- 59. Vermerris Wilfred & Nicholson Ralph, 2006, Phenolic compound Biochemistry Learning outcome:

After completion of the course student would be able to-

- 1. Differentiate the genetics changes and can justify the reasons.
- 2. signify the maternal inheritance can be very well elaborated.
- 3. Explain how mutations can lead to variation and lethality.
- 4. Can apply their knowledge to the changes in population genetics.
- 5. Classify Carbohydrates, Lipids, fatty Acids and their importance

Syllabus Prescribed for 2023 Programme: M. Sc. Botany	PG Programme	
Semester II Code of the Course/Subject	Title of the Course/Subject (Laboratory/Practical/practicu	(No. of Periods/Week)
Practical IV	m/hands-on/Activity) Practical based on DSC I.2 & DSC-II.2	04

* List of Practical/Laboratory Experiments/Activities etc.

Plant Physiology: (Only 12 Experiment should be perform to which 8 Major and 6 Minor). Laboratory Exercises:

Major:

- 1. Extraction of chloroplast pigments from leaves and preparation of absorption spectrum of chlorophylls and carotenoid.
- 2. To determine chlorophyll a, chlorophyll b and total chlorophyll ratio in C3 & C4 plants.
- 3. Estimation of sodium and potassium in plant material by flame photometry.
- 4. Determination of Ca: Mg ratio by spectrophotometry in plant tissue.
- 5. Preparation of the standard curve of proteins (BSA) by Biurette method.
- 6. Determination of Isoelectric point of Legumin.
- 7. Effect of GA/IAA on plant growth.
- 8. Isolation of intact chloroplasts and estimation of chloroplast proteins by spot protein assay.
- 9. To demonstrate photophosphorylation in intact chloroplasts, resolve the phosphoproteins by SDS-PAGE & performs Western blotting.

10. Estimation of protein content in extracts of plant material by Lowry's or Bradford's method. **Minor:**

- 1. Principles of colorimetry, spectrophotometry and fluorimetry.
- 2. Demonstration of an electron transport system.
- 3. Estimation of carbon dioxide liberated during respiration.
- 4. To demonstrate the process of antagonism.
- 5. To demonstrate the process of tissue tension.
- 6. Detection of amino acids by chromatography.
- 7. Effect of various salts on the permeability of the plasma membrane.
- 8. Estimation of Ascorbic Acid in the given material.
- 9. Estimation of reducing, Non-reducing and total sugars.
- 10. To determine the Osmotic pressure of vacuolar sap of *Rheo discolar* or *Tradescantia* leaves by Plasmolytic method (50% plasmolysis)
- 11. To determine the diffusion pressure deficit (water potential) of potato tuber tissue by weighing method
- 12. To determine the structure, size and frequency of stomata in mesophytic and xerophytic leaves
- 13. To determine the rate of transpiration of plant i. Weight ii. Potometer method
- 14. To determine the rate of transpiration by Cobalt Chloride paper method and to calculate transpiration index (TI), Transpiration efficiency (TE) of various leaves
- 15. To measure the rate of photosynthesis in aquatic plants by Willmotts bubble counting method
- 16. To study the effect of-i. CO2; ii. Light quality and intensity; iii. Injury; iv. Temperature on the rate of photosynthesis in leaves of an aquatic / terrestrial plant
- 17. To extract the major plant pigments from leaves by different solubility method.
- 18. Demonstration of polyphenoloxidase in plant tissue.
- 19. Action of invertase on sucrose.
- 20. Effect of temperature on enzyme activity.

21. Action of salivary enzyme on starch.

Evolution and Diversity of Bryophytes and Pteridophytes:

- 1. Morphological, anatomical and reproductive studies of following members: Targonia, Cyathodium Marchantia, Plagiochasma, Deumortiera, Anthoceros, Notothylus; Polytrichum, Pogonatum, Sphagnum, Funaria.
- 2. Study of morphology, anatomy and reproductive structure of Pteridophytic forms Psilotum, Lycopodium, Marsilea, Selaginella. Isoetes, Equisetum, Gleichenia, Pteris, Ophioglossum, Azolla, Salvinia, Adiantum, Angiospteris.
- 3. Study of fossil forms: Rhynia, Calamites, Calamostachys, Lepidodendron, Zygopteris.
- 4. Field study
 - i. Visits to the field to study distribution of Bryophytic and Pteridophytic forms.
 - ii. Monographic and photographic presentation of Bryophytic and Pteridophytic material.

SANT GADGE BABA AMRAVATI UNIVERSITY, AMRAVATI PRACTICAL EXAMINATION M.Sc. I Botany, Semester- II (NEP-20)

PRACTICAL IV:- (PLANT PHYSIOLOGY + EVOLUTION AND DIVERSITY OF **BRYOPHYTES AND PTERIDOPHYTES)**

TIME: -6 Hrs.

Maximum Marks: -50 + 50 = 100

Q.1.	Perform Major Experiment in Plant Physiology.	10
Q.2.	Perform Minor Experiment in Plant Physiology.	05
Q.3.	Identification of given Bryophytic form on basis of Morphology, Anatomy,	10
	and Reproductive organs from given material (One double stained slide prepar	ration).
Q.4.	Identification of given Pteridophytic material on basis of morphology,	10
	Anatomy and Reproductive organs (one double stained slide preparation).	
Q.5.	Comment on one Plant Physiology experiment set up.	05
Q.6.	Spotting Bryophytes (03), Pteridophytes (03) and Fossil specimen (04)	10
Q.7.	Internal marks: Practical Record (20); Viva voce (20); Student overall	50
	performance and Activity – Botanical Excursion with field study report /Mon	oranh

performance and Activity – Botanical Excursion with field study report /Monograph and Attendance (10)

Syllabus Prescribed for 2022 Programme: M. Sc. Botany	Year PG P	PG Programme	
Semester II Code of the	Title of the Course/Subject	(No. of Periods/Week)	
Course/Subject	(Laboratory/Practical/practicu m/hands-on/Activity)		
Practical – IV	Practical based on Paper DSC- III.2	02	

* List of Practical/Laboratory Experiments/Activities etc.

Genetics and Plant Breeding (Practical's)

Laboratory Exercises

- 1. Preparations of Stains, Dyes, Preservatives, Fixatives and pre-treatment for the material
- 2. Karyomorphological studies from slides/photograph.
- 3. Banding studies using Giemsa, Orcein, Florescent dyes.
- 4. Induction of mitotic abnormalities through mutagens.
- 5. To determine pollen viability and germination using fluorescent dyes and cell wall staining with Calcoflour.
- 6. Problem on Mendelian inheritance and interaction of genes, linkage and crossing over.
- Demonstration of SEM.
 Feulgen staining.
- 9. To study polygenic inheritance
- 10. Study of quality traits in some local crops cotton, soybeans, Wheat, Brassica etc.
- 11. Study the Meiotic configurations in maize, Alliums', Rheo, Tradescantia, Aloe etc.
- 12. Study of chromosomal aberrations in irradiated material.
- 13. Use of Colchicines in induction of polyploids in suitable plant material.
- 14. Karyotype analysis.
- 15. Study of Floral Biology of some crops.

Plant Biochemistry and Pharmacognosy:

- 1. Study of powdered drugs physical, chemical and microscopic examinations.
- 2. Quantitative microscopy of leaf drug stomatal frequency and stomatal index,
- 3. .Determination of palisade ratio and vein islet number.
- 4. Qualitative determination of alkaloids, tannins, steroids and saponins from medicinal plants
- 5. Determination of water soluble and water insoluble ash from crude drugs.
- 6. Determination of foaming index from crude drugs
- 7. Determination of titratable organic acid from leaves and fruits
- 8. Estimation of phytic acid
- 9. Determination of total phenol content from powdered drugs.
- 10. Determination of free radical scavenging activity of methanolic extracts of powdered drugs.
- 11. Effect of pH on enzyme activity.
- 12. Estimation of PPO oxidase from plant sample.
- 13. Estimation of Riboflavin
- 14. Estimation of Tannins [Folin Denis / Vanillin hydrochloride]
- 15. Separation of proteins by SDS-PAGE
- 16. Determination of Nitrate reductase activity
- 17. Estimation of ascorbate peroxidase enzyme from plants
- 18. Estimation of carbohydrate by Anthrone reagent
- 19. Pharmacological screening of Anti-diabetic Agents.
- 20. Determination of anti-oxidant activity from local plants.
- 21. Screening of Crude Drugs for Anti-microbial activity.
- 22. Phytochemical screening methods: Paper Chromatography, TLC, HPLC, Spectrometry.
- 23. Identification and Estimation of Lipids
- 24. Determination of adulteration in crude drugs.
- 25. Determination of extractive value of crude drugs.
- 26. Identification of organized and unorganized plant drugs
- 27. Separation of anthocyanin from flower petals using TLC
- 28. Extraction and estimation of lycopene.
- 29. Determination of pH of fresh and dry material of the following plants (Ocimum, Adhatoda leaves, Terminalia arjuna fruit,)
- 30. Estimation of curcumin in given sample.
- 31. Evaluation of natural products estimation of the ash value and determination of water soluble and acid soluble ash (Muffle furnace);
- 32. Determination of moisture content of sample using moisture balance method; Determination of microscopic characters
- 33. Estimation of Rutin

SANT GADGE BABA AMRAVATI UNIVERSITY, AMRAVATI PRACTICAL EXAMINATION M.Sc. I Botany, Semester- II (NEP-20)

PRACTICAL V: - (Plant Biochemistry, Genetics and Plant Breeding)

TIME: -6 Hrs.	Maximum Marks: -25 + 25 = 50	
To perform Karyomorphological studies of the given	material. 05	
To perform given experiment on Plant breeding.	05	
Spotting's on Genetics and Plant breeding	05	
Perform one major Plant Biochemistry experiment.	05	
Perform qualitative analysis of any two secondary me material.	tabolites from given 05	
Internal marks : Practical Record (10); Viva voce (performance and Activity – Field visit report (Agric Research Institute) / Monograph and Attendance (0)	ulture University, Nursery,

Practical Examination Botany Semester- II (NEP)

Practical VI

Angiosperm Taxonomy, Phytochemistry and Pharmacognosy

Practical Schedule

Time 6hrs	Marks-2	25+25=50
Q.1: Systematic description of two Angiospermic plants (on Monocotyledons)	•	ne from Iarks
Q.2: Preparation of artificial key	05 N	Iarks
Practical Internal	10	
Q.3: Viva-Voce Q.4: Practical Record, Attendance and Assignments	10 15	
Part B		
Syllabus Prescribed for 2023 Year	PG. Programme	
Programme	M.Sc. Botany	
Semester II		
Code of the Course Subject Title of the Couse/ Subject	No. of periods/ week	
DSE-II BOT204-B Molecular Systematics of Plants- Elective-II 03		
Cos : On completion of the course, the student should be able to		

Discuss and apply principles of delimitation and identification of species and other taxa Account for the central concepts of the field and principles of phylogenetic analysis, especially based on the parsimony criterion Discuss and apply methods to generate relevant molecular data, mainly

14. Choose and apply existing software in the included course parts, from

generating relevant molecular data to phylogenetic analysis 15. Critically analyse, evaluate, compile, and present the results of

phyloger	netic analyses.		
Unit-I	Molecular markers in systematics: selection of suitable		
	markers.		
	Comparative account and suitability of single gene markers		
	over multigene markers in phylogenetic analysis.		
Unit-II	Types of molecular data, analysis of molecular data		
	alignment of sequences, homoplasy.		
	Phylogeny reconstruction, gene trees and species trees;		
	molecular characters- chloroplast and mitochondria DNA		
	structure and their role in systematics.		
Unit-III	2.1 Models of evolution: concept, and their applicability,		
	long branch attraction, bootstapping,		
	2.2.Heuristic solutions and statistical approaches.		
	Optimality criteria – distance, polymorphism analysis.		
	Taxonomic data bases; their need, taxonomic Databases		
Unit-IV	working Group, the Tree of life.		
	Taxonomic information systems- Database at the Roya		
	Botanical Garden, online herbaria, ETI database,		
	Taxonomic softwares		
Unit-V	5.1 Description of Phylogenetic trees, clustering algorithms		
	and various method for tree building.		

	5.2 Phylogenetic Analysis softwares: Phylip, PAUP,	
MEGA, RxAML etc. Clustering method -UPGMA		
	Cladistic method – Parsimony	
Unit-VI	Molecular evolution: nucleotide substitution models,	
	molecular clocks.	
	The evolutionary origin of the chloroplast and evolution	
	of plastid genome.

18.Kormondy, E.J. (1996). Concepts of Ecology. Prentice Hall, U.S.A. 4th		
edition.		
19.Sharma, P.D. (2010) Ecology and Environment. Rastogi Publications, Meerut,		
India. 2. Simpson, M.G. (2006). Plant Systematics. Elsevier Academic Press,		
San Diego, CA, U.S.A.		
20.Singh, G. (2012). Plant Systematics: Theory and Practice. Oxford & IBH Pvt.		
Ltd., New Delhi. 3rd edition.		
Learning Outcome:		
	After successful completion of this course, students will	
	be able to:	
	7. Understand historical development of taxonomy.	
	8. Explain concept of species. Order sub and super	
	categories of species according to Linne hierarchy.	

Syllabus Prescribed for 2023 Year Programme: M. Sc. Botany

PG Programme

Semester I Code of the	Title of the Course/Subject	(No. of Periods/Week)
Course/Subject	(Laboratory/Practical/practicu m/hands-on/Activity)	
Practical – VI	Practical based on DSC- II	02

DSE Molecular Systematics of Plants- Elective-II

Laboratory Exercises

Major Experiments

- 1. Use of molecular markers to determine genetic relatedness between species
- 2. Construction of dendrograms using appropriate software
- 3. Comparison of different species of a genus and different genera of a family to calculate similarity coefficients.
- 4. Commelinids: Commelinaceae, Poaceae, Cyperaceae
- 5. Basal Eudicots and Caryophyllids: Ranunculaceae, Caryophyllaceae
- 6. Rosids: Euphorbiaceae, Rosaceae, Fabaceae, Cucurbitaceae
- 7. Asterids: Solanaceae, Lamiaceae, Apiaceae, Asteraceae

Minor Experiments

- 8. PCR Based amplification of genes.
- 9. Sequencing protocol.
- 10. Method of gene Annotation.
- 11. Blast analysis of DNA sequence.

Sant Gadge Baba Amravati University, Amravati

Practical VI
Molecular Systematics of Plants- Elective-I
Practical Schedule

Time 6hrs	Marks-25+25=50
Q.1: Systematic description of any two plant.	20 Marks
Q.2: Any one minor experiment on molecular systematics	05 Marks
Practical Internal	
Q.3: Viva-Voce	10
Q.4: Practical Record, Attendance and Assignments	15

Part B			
Syllabus Prescril	bed for 20	23 Year	PG. Programme
Programme			M.Sc. Botany
Semester II			
Code of the Cours	e Subject	Title of the Couse/ Subject	No. of periods/ week
DSE-II B	ОТ204-С	Plant Tissue Culture- Elect	ive-II 03
 Cos: On completion of the course, the student should be able to 16. Acquire a critical knowledge on applications of plant tissue culture. 17. Demonstrate skills related to haploid culture through hands on experience 18. Understand the cell culture technique for production of secondary metabolites. 19. Comprehend the applications of plant hormones in plant tissue culture. 			
Unit-I	and applio G	clonal variations: explant sou media components, cau cations. enetic basis of somaclonal var leristem culture – methods, ad	ises, advantages and riation.
Unit-II	Haple signit Andr steps Gync	bid production : steps, culture : fiance. ogenesis : Anther culture : cul screening of haploids and app genesis : Ovule and ovary cul <i>-vitro</i> pollination and fertilisa	requirments, ture requirments, plications ture and applications
Unit-III	Dista haplo Polle Polyp haplo	nt hybridization : concept and id production. n Culture technique, <i>In-vitro</i> N bloid Culture. Screening metho id cells. Triploid production (ole of haploid and polyploids	applicability in Aonoploid and ods for selection of Endosperm culture).

Unit-IV Cell culture: Isolation of Single cell, different techniqu					
	for Single Cell Culture (SCC), advantages of SCC.				
	Suspension culture: types of suspension culture Cell growth measurement viability tests.				
	Cell growth measurement, viability tests, synchronization of cultures, applications, factors				
	synchronization of cultures, applications, factors affecting single cell culture.				
	affecting single cell culture.				
Unit-V	Endosperm culture: culture requirements, steps and				
	applications				
	Embryo culture, culture requirements, steps applications,				
	Embryo rescue technique, steps and its applications.				
	Production of pathogen free plants; virus- elimination				
	through in-vitro technique.				
Unit-VI	Role of Plant hormones (auxins, cytokinins, abscissic acid,				
	ethylene and Gibberellins) in In-vitro cultures.				
	The journey and new breakthroughs of plant growth				
regulators in tissue culture.					
	Suggested Reading:				
1. Pullaiah. T. and	d M.V.Subba Rao. 2009. Plant Tissue culture. Scientific				
Publishers, Ne					
2. Bhojwani, S.S. and Razdan, M.K., (1996). Plant Tissue Culture: Theory and					
Practice. Elsevier Science Amsterdam. The Netherlands.

Part B

Syllabus Prescribed for 202	23 Year PG. Pi	rogramme
Programme	M.Sc	e. Botany
Semester II		
Code of the Course Subject	Title of the Couse/ Subject	No. of periods/ week
DSE-II BOT204-D	Advanced Plant Physiology -Elective	03

Cos : On completion of the course, the student should be able to The course will deal with various advanced plant physiological fundamental aspects, evolutionary physiology, secondary metabolites and defence system

Unit-I	Respiration:		
	Glycolysis, anaerobic respiration, TCA cycle; Oxidative phosphorylation,		
	Glyoxylate, Oxidative Pentose Phosphate Pathway.		
Unit-II	Photoperiodism:		
	Photoperiodism (SDP, LDP, Day neutral plants); Phytochrome (discovery and		
	structure), red and far red light responses on photomorphogenesis;		
	Vernalization. Practical applications of vernalization and photoperiodism		
Unit-III	Plant responses against environmental challenges:		
	Signal perception, transduction and responses against different environmental		
	changes and challenges (water, light, temperature, elevated CO2, mineral		
	toxicity and salt).		
Unit-IV	Plant responses against environmental challenges:		
	Osmoprotectants, stress proteins, Oxidative stress: reactive oxygen species		
	(ROS) – role of scavenging systems (SOD, catalase etc.). Functions of HSPs		
	chilling stress.		
	Phytochelatins, role of membrane lipids in high temperance tolerance.		
	Molecular regulation and crosstalk among different signalling pathways.		

Unit-V	Photomorphogenesis			
Unit-v	Regulation of Photomorphogenesis and skotomorphogenesis			
	Wavelength-specific photoreceptors (Phytochromes, Cryptochromes,			
	Phototropins etc), E3 ubiquitin ligases and TFs crosstalk; signal cascade for			
	morphogenic responses. Synergic effect of BRs and Auxins and other growth			
	regulators			
Unit-VI	Sensory physiology			
	Sensory physiology: Biochemical and biophysical mechanisms of sense of			
	touch, electric self-defense, taste, light, explosion, sleeping and rhythms.			
	Stimuli/mechanical force triggered movements; actin-myosin motors;			
	neurotransmitters in plants.			
9 Davie	Suggested Reading: s, P.J. (2004). Plant Hormones: Biosynthesis, Signal Transduction, Action. 3rd Edition,			
	er Academic Publisher, Dordrecht, The Netherlands.			
	a, B.R. (2006). The Molecular Biology and Biotechnology of Flowering, 2nd Edition,			
	International, Oxfordshire, U.K.			
	n, D.L. and Cox, M.M. (2008). Lehninger Principles of Biochemistry (5thed.). New York			
	anan, Gruissem and Jones. 2002. Biochemistry and Molecular Biology of Plants.			
	ican Society of Plant Biologists.			
	al Review of Plant Biology (formerly Annual Review of Plant Physiology and			
	Molecular Biology).			
	C REFERENCES: Alberts et al., Molecular Biology of the Cell (parts related to			
plants); Salisbury and Ross, Plant Physiology; Taiz and Zeiger, Plant Physiology;				
_	ins and Huner, Introduction to Plant Physiology.			
	RENT LITERATURE (JOURNAL ARTICLES): Plant Physiology, The Plant			
	Journal of Plant Physiology, Physiologia Plantarum, Plant Physiology and			
Bioch	emistry, Postharvest Biology and Technology, Hortscience, Journal of the			
Amer	ican Society for Horticultural Science, Science, Nature, Scientific American etc.			
16.Many	plant physiology journals can be viewed via the net. The URL of one of the sites			
listing	g these journals is: <u>http://www.e-journals.org/botany/</u>			
	Learning Outcome:			
	ssful completion of this course, students will be able to:			
	e students will learn and demonstrate the physiological mechanisms of Water,			
	nerals uptake and transport; they can correlates with present day's challenges for			
-	nt growth, development and survival.			
	e students will understand the evolutionary history of photosynthetic organisms and			
their adaptability in changing environmental conditions; they can interpret the				
-	otosynthetic productivity in relation to changing climatic conditions and food			
	urity ey will acquire the knowledge and demonstrate the various mechanisms of			
	assocation of photosynthetic products to different sink			
	e students will learn various plant responses against environmental changes and			
	illenges; they can understand unique strategies of plants to resolve the various			
	esses

Syllabus Prescribed for 2023 Y Programme: M. Sc. Botany	Year PG P	PG Programme	
Semester II Code of the	Title of the Course/Subject	(No. of Periods/Week)	
Course/Subject	(Laboratory/Practical/practicu m/hands-on/Activity)		
Practical – VI	Practical based on Paper DSE-	02	
	II Advanced Plant		
	Physiology -Elective		

List of Experiments:1. Determination of osmotic potential of plant cell sap by plasmolytic method.

- 2. Demonstration of transpiration with the help of photometers.
- 3. Calculation of stomatal index and stomatal frequency of a mesophyte and a xerophyte.
- 4. Demonstration of activity of catalase and study of effect of pH and enzyme concentration.
- 5. To study the effect of light intensity and bicarbonate concentration on O2 evolution in photosynthesis.
- 6. Comparison of the rate of respiration in any two parts of a plant.
- Separation of photosynthetic pigments by paper chromatography.
 To determine the RQ of different respiratory substances.

Cos:			
Upon completion of thi	s course successfully	r, students wou	uld be able to
fungi. 6. Study important Deuteromycota. 7. To appreciate the	groups of fungi Asco beneficial roles fung and the Pharmacy.	omycota, Basid gi play in biote	echnology,
Unit-I Ascomycota	Structure, Reproduct	ion, Life cycle	e and significance of th
	following representat	ive:	
	Morchella, Neuro General characte with life cycle Sphaerotheca and 2. Loculoascomyce	ospora. rs and Classific of <i>Erysiphe</i> , d <i>Claviceps</i> . tes: General cha	nericella, Chaetomiun cation of Pyrenomycete Uncinula, Phyllactinia aracters and importance.
Unit-II Basidiomycota	1. Basidiomycota: Ge	eneral vegetativ	e and reproductive

	characteristics of Urediniomycetes, Hymenomycetes and	
	Gasteromycetes.	
	2. A comparative account of vegetative and reproductive	
	structures, Life cycle patterns of	
	3. Puccinia, Ustilago, Termitomyces, Pleurotus,	
	Auricularia, Ganoderma, Polyporus, Lycoperdon,	
	Dictyophora, Geastrum, Cyathus.	
Unit-III Deuteromycota	1. Characteristics features and classification of	
	Deuteromycota	
	2. General Characteristics of class Agonomycetes,	
	Hypomycetes, and Coelomycetes.	
	3. Morphological and pathological comments on some	
	important Genera - Alternaria, Fusarium, Colletotrichum,	
	Curvularia, Helminthosporium, Phoma, Phyllosticta,	
	Ascochyta Botryodiplodia, Macrophoma, Diplodia,	
	Cercospora.	
Unit-IV Fungal	1. Saprophytes - Fungal decomposition of organic matter,	
biotechnology	coprophilous fungi, cellulolytic fungi, lignolytic fungi.	
	2. Keratinophilic fungi- Distribution, Isolation and economic	
	importance	
	3. Endophytic fungi for natural product.	
	4. Fungal Volatile organic compounds and their applications.	
	5. Fungi and bioluminescence	
	 Fungi as Human pathogens- Dermatomycosis (<i>Tinea</i>), systemic mycosis, its symptoms, 	
	Clinical aspects and control measures	
	7. Phytoalexins: General account, types and importance.	
	 8. Mycotoxins: General account, types and importance. 	
Unit-V Fungal	1. Introduction: Myconanotechnology, Mycosynthesis	
Nanotechnology	2. Role of Fungi in Synthesis of Nanoparticles	
	3. Synthesis of Different Nanoparticles using Fungi	
	4. Mechanism of Synthesis	
	5. Applications of nanoparticles synthesized by Fungi.	
Unit-VI Fungi in Pharmaceuticals	1. Endophytic Fungi and their secondary metabolites.	
1 hai maccuticais	2. Drug development from Fungal Secondary metabolites.	
	3. Bioactive molecules from fungi and their Applications.	
	4. Fungal compounds as anticancer agents.

Lea	rning Outcome:
On	completion of this course, the students will be able to:
•	Summarize the characteristic features of fungi
•	Compare between myxomycota and eumycota.
•	List the general characters of mastigomycotina.
•	Describe the ways of asexual and sexual reproduction in ascomycotina
•	List the characteristic features of ascomycotina and their classification
•	Differentiate between famous genera within ascomycetes.
•	Write economic importance of Aspergillus and Penicillium.
•	Subdivide the different classes in basidiomycetes
•	Summarize the characters of deuteromycotina
•	Compare between studied genera within deuteromycotina

Programme	Programme M.Sc.Botany					
Semester II						
Code of the Course	Subject Title	of the Couse/Sub	ject	No.of per	No.of periods/week	
DSE-I BOT204-1 03	Ţ	Molecular	Biology,	Biotechnology	&	
	Plant B	reedingElective-	Π			
 Cos: On completion of the course, the student should be able to Tolearnthebasicprinciplesofmolecular biology & plant breeding Todemonstrate themethods in molecular biology & plant breeding Understand the applicability of molecular biology & plant breeding in Relation to present day problems. To gain the Knowledge about laboratory organization for molbio. Understand various Aseptic techniques for plant tissue culture. Unit-I InGene mutation: Insertion deletion, frame shift and suppressor mutation 			_			
	chemical and physical agents					
	1.2Repair of DNA	and Various enzy	vmes involv	ed in repair of	DNA.	
	1.3. Genetic recombination: Mechanism of genetic recombination,					
	Transformation, Transudation, Conjugation,					
	1.4 Various models of recombination.,					
Unit-II	Genetics and Molecular organization:					
	2.1Genes concept,	genome, Mult	igene fami	lies, Pseudogene	es, split genes,	
	overlapping genes,genetic code.					
	Nuclear genome of	rganization :				

	2.2Genome size, Kinetics of DNA denaturation and renaturation, the law of
	DNA constancy and C- value paradox
	2.3Kinetic classes of DNA – Repetitive and Unique DNA
	Sequences and its significance.
	Genomic stability :
	3.4 Molecular characteristics, properties and significance of eukaryotic mobile
	genetic elements -Ty elements in Yeast; Copia elements in Drsophila, Ac-
	Ds,Spm – dSpm elements in maize. Role of mobile geneticelements in evolution.
Unit-III	3.1Plant transformation technologyBasis of tumour formation, hairy root,
	features of Ti and Riplasmid, Mechanisms of DNA transfer, role of virulence
	genes, use of Ti and Ri plasmid as vector, binary vector; Use of 35S and other
	promotors,
	3.2 Genetic markers, use of reportergenes, reporter genes with introns, use of
	scaffoldattachment regions;
	3.3 Methods of nuclear transformation, viral vectors and their application,
	multiple gene transfer;
	3.4 Vectors-less or direct DNA transfer and particlebombardment,
	eletroporation, microinjection.
Unit-IV	4.1Gene cloning vectors: Plasmids: general cloning vector, fusion plasmids,
	plasmids with bacteriophage promoters,
	4.2 Vectors; Shuttle vectors, phagmids, phages: as cloning vector, insertion
	vectors, replacement vectors, Ca MV, Animal viral vectors- SV-40,
	Vaccinia/Bacculo and retro viral cosmids,
	4.3Artificial chromosomes: yACs, mega yACs. BAC vector; Methodsof
	detection of recombinant;
	4.4 Nucleic acid purification:Different chemicals used in isolation and
	purification ofnucleic acids, Yield analysis:
Unit-V	5.1 Nucleic acid amplification and its application: History and
	Method of nucleic acid amplification, Nucleic acidamplification: DNA
	amplification, RAPD, AFLP, asymmetric
	5.2 Polymer chain reaction, PCR, RT PCR, 5'RACE, 3' RACE, invert PCR,
	Syber green, hybridization probe amplification, hydrolysis probe amplification
	(Taq man), Scorpion primers;
	5.3Basic biochemical requirement of thermal cycler: Solutions, enzymes,
	buffer, primers, designing of primers, necessary conditions required for designing
	primers,
	5.4fluorescent: use of fluorescent dyes andquenchers in primers used for real
	time PCR, annealingtemperature, calculation of Tm of primers and
	optimization of PCR conditions; Instrumentation of thermal
	cycler:Instrumentation of general thermal cycler, gradient cyclerand Real time
	cycler; Applications of nucleic acid
	amplifications in different fields

Unit-VI	6.1Self-incompatibility and male sterility in crop plants and their commercial		
	exploitation.		
	6.2Pure line theory, pure line selection and mass selection methods; Line		
	breeding, pedigree,		
	6.3 Bulk, backcross, single seed descent and multiline method; Population		
	breeding in self pollinated		
	6.4 Crops (diallel selective mating approach).

30. Watson J.D, Baker T.A, Bell S.P, Gann A, Levine M and LosickR. Molecular Biology of the Gene. Benjamin-Cummins Publishing Co.,

Learning Outcome:

After successful completion of this course, students will be able to:

- 1. Become familiar with sterile techniques, media preparation, DNA extraction methods, gene isolation and nucleotide sequence analysis,
- 2. Support methodologies in plant tissue/cell culture to plant improvement, as well as DNA handling with PCR-based detection diagnostic tools,
- 3. Understanding the basic steps of gene cloning and the role of enzymes and vectors responsible for gene manipulation, transformation and genetic engineering.
- 4. Outline the fundamental steps in a genetic engineering procedure.

Semester I	Code of the Course/Subject	(No. of Periods/Week)
Title of the Course/Subject	(Laboratory/Practical/practicum/ hands-on/Activity)	02

List of Experiments:

- 1.Isolation of genomic DNA
- 2 Southern blotting
- 3.Isolation of RNA
- 4. Preparation of tissue culture medium.
- 5.Cell fusion with PEG.
- 6.Isolation of plasmid DNA.
- 7. Artificial seed preparation.

8Incompatibility – Pollen viability test
a. *In vitro* a. Brewbaker's medium preparation
b. Staining test in acetocarmine
9.Principles of PCR, Electrophoresis.

SANT GADGE BABA AMRAVATI UNIVERSITY, AMRAVATI PRACTICAL EXAMINATION M.Sc. I (Botany), SEMESTER – II (NEP-20)

PRACTICAL-VI: Molecular Biology, Biotechnology, and Plant Breeding-Elective-II DSC-II

Time: 3 Hrs.	Marks: 25+25=50
Q.1: Setting and working on any major experiment	15
Q.2: Setting and working on any Minor experiment	05
Q.3 Comment on principle and working of analytical instrument.	05
Practical Internal	
1. Attendance	05
2. Visit to any Molecular/Biotechnology & Report Submission.	10
3. Activity-	
Botanical Excursion/Short/Long- to study the plant	
diversity in natural habitat Report Submission.	05
4. Record Book	05

Other faculty/ stream course

Part B Syllabus Prescribed for 2022 Programme Semester II		ar PG. Programme M.Sc. Botany	
Code of the Course Subject BOEC II	Title of the Couse/ Subject Floriculture and nursery Managemo	No. of periods/ week ent 04	
 Cos: Upon the satisfactory completion of class assignments and the classroom experiences provide in the course, the student should expect to be able to: 1. List and describe procedural steps necessary during floriculture crop production from propagation to marketing. 		* *	
 Identify and define enverops. Develop production sc Grow several crops in Identify and name som 	and define environmental factors that regulate growth and flowering of floriculture o production schedules for floriculture crops. everal crops in the greenhouse through nursery management. and name some floriculture crops and classify them as potted, cut and/or garden crops. o methodology for production of horticultural crops through seeds.		
Unit-I	Floriculture: Concept, Scope an Scope of Floriculture in India, S		
Unit-II Common Garden operation using different impl commercial floriculture, soil selection, preparation nursery beds, system of plating, water and management, bed management, propagation by cutting budding, grafting.		using different implements, selection, preparation of soil plating, water and nutrient	
Unit-IIIHarvesting & Processing of Flowers: Harvesting tech Postharvest handling and grading, packing and s transportation & marketing commerce.		ading, packing and storage,	
Unit-IV	Nursery Site: Types of Nurser Nursery establishment, Size of area, Germination section, Tran	Nursery, Soil type, Production	

Suggested Reading:	Nursery Management.								
1. Hartmann, H.T., Kester and practices (8 th Edition	D.E., Davis, F.T and R.L Geneve (2010) Plant Propagation: Principles n).								
2. Sharma, R.R and Srivas Edition) International B	tav M (2004): Plant propagation and nursery management (First ook Distributing Co.
